

# Poster Contributions

September 16, 2012

1. G. De Andrade (UERJ), PMF in torsion parity violation
2. T. Röscher (AIfA, Bonn), Far-infrared deficient and molecular intermediate velocity clouds
3. D. Meyer, (AIfA, Bonn), Modelling the circumstellar medium of massive runaway stars
4. M. den Heijer (AIfA, Bonn), Tully-Fisher relation for early-type galaxies
5. C. Few (Jeremiah Horrocks Institute), Recovering Abundance Ratios and Supernovae Rates with Numerical Chemodynamics
6. P. Girichidis (MPA Garching), TBD
7. K. Tanaka (Kyoto University), Thermal Structures of Low Metallicity Disks
8. B. Patzer (ZAA, TU Berlin), Small TiC cluster properties: Implications for dust nucleation studies under the conditions of C-rich AGB stars at low metallicity
9. K. Chen, From the First Stars to the First Galaxies
10. M. Langener, D.J. Bomans (Astronomical Institute, Bochum), Metal-poor intermediate redshift dwarf galaxies in the CDF-S
11. K. Weis (Astronomical Institute, Bochum), LMC LBV nebulae as a stepping stones to stellar evolution and feedback at low Z
